Abstract:

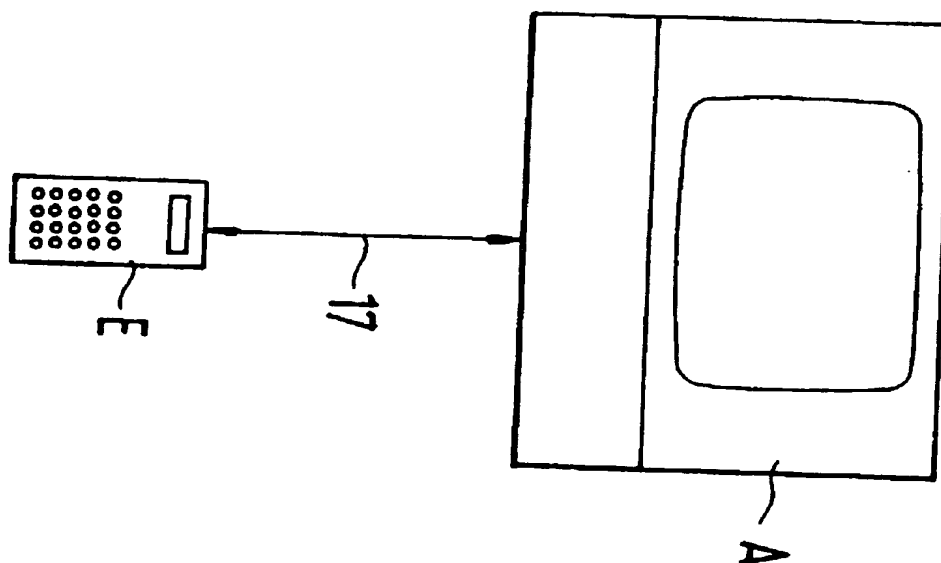

DE 4443850 A

The portable data acquisition unit that has the general form of a pocket calculator (E) coupled via a serial interface to a main computer (A) that carries out an evaluation process. The acquisition unit allows code to be generated to log onto the system and to identify the correct files for data entry.

Cursor controls are provided on the unit. Time of use is measured and logged against the specific projects.

ADVANTAGE - Allows evaluation of data for number of project operations.
